

Wireless Temperature Sensing Kit

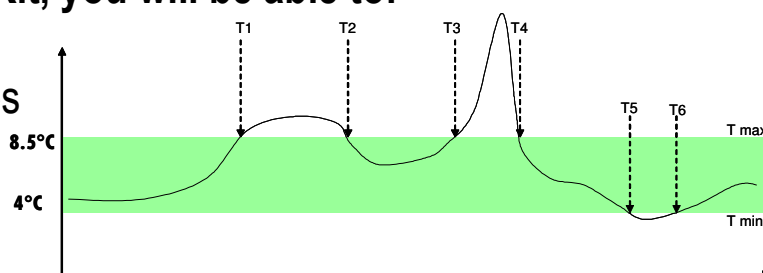

Controlling and monitoring temperature provides energy savings, quality assurance and reduced waste in many industries and service sectors.

- Food storage and transportation (cold-chain), e.g. fish, meat, ice-cream, fruit and vegetables
- Healthcare: infant incubators, blood bank, pharmaceuticals
- Manufacturing: machine rooms, air-conditioning, warehouse
- Enterprise: data centre, air-conditioning, energy saving

With Free2move's Temperature Sensing Kit, you will be able to:

- Identify tags at up to 60 metres range
- Read out continuous temperature values
- Evaluate various temperature sensing scenarios and applications
(together with suitable application development environment)

The Kit includes:

- 1 × Reader with host interface, antennas and power adapter (EU, US, UK, AU)
- 2 × Standard temperature sensing tags with CR2032 battery
- 3 × Long life temperature sensing tags with 2 x AAA batteries
- CD with evaluation software, documentation and source code examples

Order no:

FSK-0702-U

RS232 & USB version

FSK-0702-L

Ethernet LAN version

(Plus freight. When ordering 3 or more kits, freight is waived)
